

Laboratory Moving Solutions

Moving a Lab? We're the partner that can help.

Ace World Wide—Specialists in unique & proven laboratory moving services

Ace Worldwide Elite Relocation Services is a large, multi-location agent for Atlas Van Lines. That differentiates our program from the vast majority of those specific to lab relocation.

A sampling of our menu of lab services are as follows:

- ◆ Planning. We assist you in all areas of this process. Site surveys allow you to share specific needs and provides us with the basis to best serve your needs.
- ◆ Communication. You and your team works directly with the Ace Laboratory team to ensure easy and accurate sharing of information
- ◆ Origin Services. Ace/Atlas teams provide Decommissioning, packing, crating and loading of laboratory items.
- ◆ Transportation. Goods are transported on Ace/Atlas specialty trailers.
- ◆ Destination services. Ace/Atlas team provides all required services.
- ◆ Specialty needs. We have generator-equipped trailers to allow for “live transport” of specimens. We can provide Chill Units if needed.
- ◆ Climate controlled/Expedited units are available to ship live specimens.
- ◆ Peace of mind. Ace Leadership/Supervisors on-site, as well as our Ace coordinators communicating with you allow for your peace of mind.
- ◆ Move Management. 100% of the services provided to you are arranged and managed by Ace.

The key to a successful lab relocation starts with you partnering with the right team that understands your needs, provides the best solution and then delivers what was promised. Because we are an asset-based provider of laboratory services and rely on only ourselves and our proven partners, makes Ace someone to speak to about your service needs.

We look forward to that conversation.

Trust your next lab relocation to the company that works consistently and professionally to deliver service quality unique to our competition.
